

Discussion

- The relevance of obscuration in the stellar content and efficiency of star formation in Starbursts.
- Tracers of SF & SF laws: how robust, how universal?

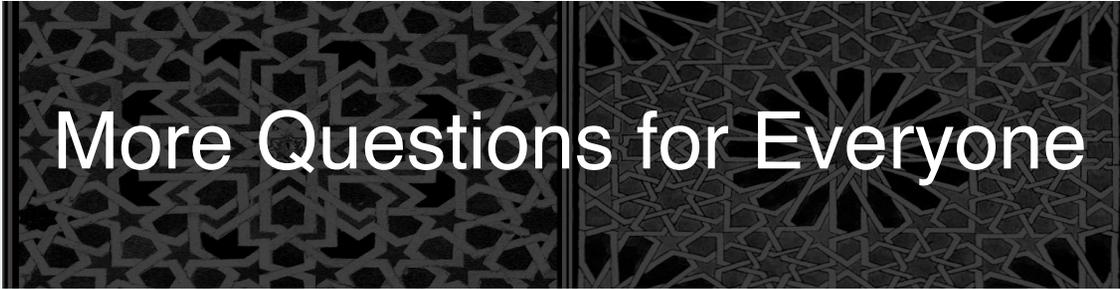

Discussion

- Is CO EVER useful as a mass tracer???
- Is UV EVER useful as a star formation tracer???

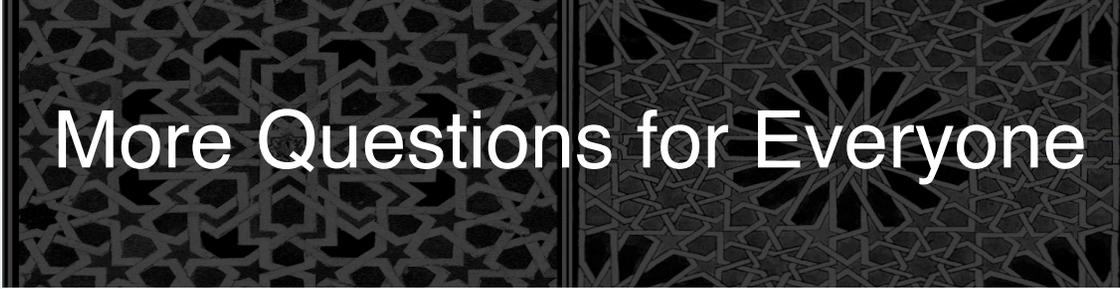

More Questions for Everyone

- Dependence on Morphologies in local universe. Relation to high z universe... (Ly-break, SMG, LAE... LBAs? - why are they uv bright? ratio to FIR?)

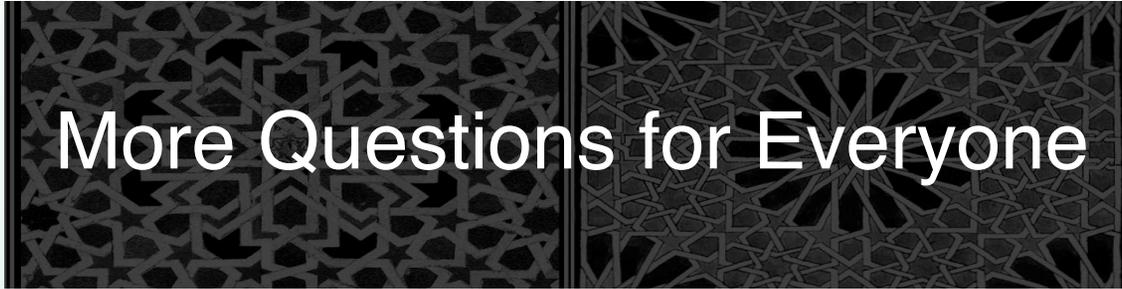

More Questions for Everyone

- Definition of Starbursts... are they all starbursts at high z ?

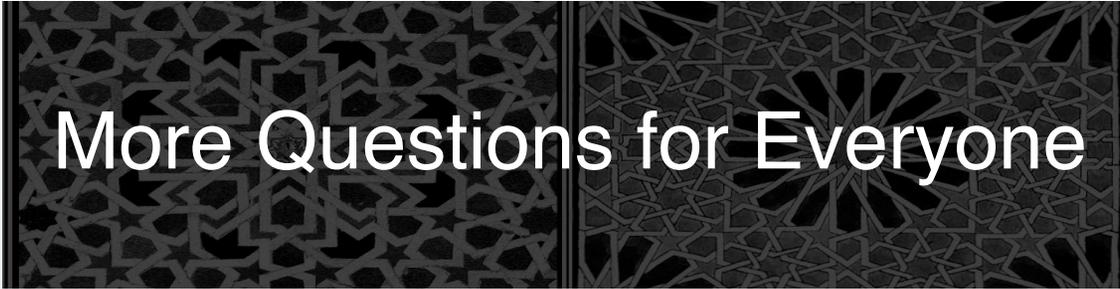

More Questions for Everyone

- What are LINERs?

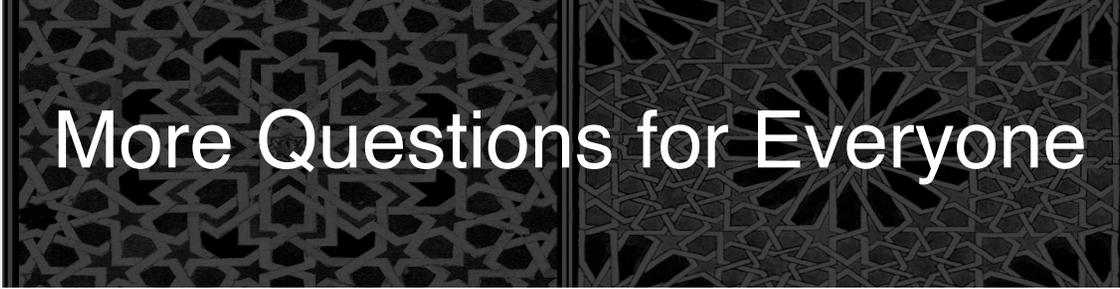

More Questions for Everyone

- Is there an inconsistency of the RSNe rates with SFRs for local galaxies (M82)?

More Questions for Everyone

- What's a normal galaxy? (SF laws; disks)

More Questions for Everyone

- Are (U)LIRGs also disks?
- Different SF law?
- Different IMF?
- Different ICMF?
- When does the black hole grow?
